PROFESSIONAL SUMMARY

Frontend Angular Developer with 5+ years of experience designing and building scalable, high-performance web applications using Angular, TypeScript, and modern JavaScript technologies. Demonstrated expertise in delivering complete frontend features from UI design and component development to API integration and state management. Skilled in optimizing application performance and implementing secure authentication flows. Known for a strong ownership mindset and excelling in fast-paced, collaborative environments.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, SQL (Basic Queries)

Frameworks & Libraries: Angular v18, RxJS, Bootstrap, Angular Material, PrimeNg.

Tools & Platforms: Git, VSCode, Jira, Postman, Bitbucket, Dynatrace, DBeaver, Jasmine.

PROFESSIONAL EXPERIENCE

Senior Software Developer

Digit Insurance

Mar 2025 – Present

Bangalore, India

- Designed and delivered Hospital Portal application from ground up, designing scalable frontend architecture in angular, serving 10k + hospitals with dynamic and mobile responsiveness.
- Implemented draft and auto-save feature for claim registration flow, reducing data loss incidents by 85%
- Engineered advanced security infrastructure implementing AES encryption/decryption for sensitive patient data and checksum validation ensuring 100% data integrity across all transactions.
- Developed a comprehensive authentication system with route guards and role-based access control (RBAC), securing application endpoints and reducing unauthorized access attempts.
- Built complex multi-step form wizards with reactive validations and dynamic form generation.
- Implemented sophisticated state management using RxJS (Subject, BehaviorSubject) and shared services, optimizing component communication and reducing API calls.

Senior Software Developer

SecureEyes Techno Service Pvt Ltd

Sep 2023 – Dec 2023

Bangalore, India

- Developed and maintained components using Angular, Typescript, CSS.
- Optimized application performance by reducing load through code refactoring.
- Collaborated with cross-functional teams including designers, product managers, and developers to deliver high-quality software
- Participated in code reviews, providing constructive feedback to peers and ensuring adherence to best practices

Senior Software Developer

Enkindle Technologies Pvt Ltd

Jun 2019 – Jun 2023

Bangalore, India

- Build and maintain applications according to the style guide and standards.
- Developed Front-end components as per the architecture design.
- Ensure user satisfaction and retention by providing responsive web application.
- Collaborate with other developers to update the website and create new features.

KEY PROJECTS

Hospital Portal: Developed a centralized platform managing end-to-end insurance claims workflow for 10K + hospitals. Implemented real-time claim tracking (claim creation, approvals and settlements), automated validation, and comprehensive reporting dashboard with Angular, reducing claim processing time by 55%
Technology used Angular (18), Typescript

TP-Trac: Cyber Supply Chain Assessment program addressing the evolving threat in supply chain risks. Project is intended to identify any potential security gaps in the client's supplier ecosystem and improve the overall capability to prevent, detect and respond to potential cyber supply chain attacks.
Technology used Angular (15), Typescript.

Insolvency Case Management System: The Project handles the Bankruptcy and Insolvency Process which is Funded and Awarded by Government of India and it is a collaborative project with a Canadian Company. It helps the insolvency professionals to handle all the bankruptcy case online from generating required forms to handling all other required information.
Technology used Angular (9,12), Typescript.

EDUCATION

Master of Computer Application
Nitte Meenakshi Institute of Technology, Bangalore.
CGPA : 8.67.

2017 – 2019
Bangalore, India

Bachelor of Computer Application
Mount Carmel College, Bangalore.
Percentage : 70%

2014 – 2017
Bangalore, India
